

## 1/2 DAY WORKSHOP DO YOU WANT TO BE AN ASSESSOR?

### Overview

1. What proportion of your patients/clients have musculoskeletal problems related to computer use?
2. How much do you know about regulations, behaviours and product availability to address these issues?

The likely answer to 1. is 'most'. If your answer to 2. is 'some' or 'not much', consider this course we have created specifically for medical professionals wanting to find out more about DSE (Display Screen Equipment) Assessments, what advice to give and products available to address Musculoskeletal problems in the workplace.

With nearly 25 years' experience of workplace ergonomics, we work constantly with

Physiotherapists, Osteopaths, Chiropractors, Occupational Therapists etc. to ensure your patients'/clients' work environment does not undo the good clinical outcomes you have worked hard to achieve. Now you can take advantage of our knowledge to help your patients/clients.

### Who should attend?

This ½ day workshop is for medical professionals (Physiotherapists, Osteopaths, Chiropractors, OT's etc.) who have limited or no experience of DSE assessments and product availability to address issues raised during an assessment or, for those looking to refresh and update their existing knowledge.

### Aims

The aims of this half day workshop is to give you –

- An understanding of the relevant regulations and guidance which apply to DSE assessments
- Understanding of the process for carrying out a DSE Assessment
- Confidence to talk to your patients about their work environment and how to improve it

### Course Objectives:

- 📦 Recognise what the DSE Regulations consist of
- 📦 Understanding of the workstation assessment process
- 📦 Gain an understanding of what physical solutions are available for common musculoskeletal disorders

### Course Outline:

- 📦 Introductions
- 📦 What is a DSE assessment?
- 📦 DSE assessments – Regulations & Guidance
- 📦 Product options for workstation adjustments
- 📦 Free Resources
