

WEBINAR:

POSTURAL AWARENESS - LABORATORY

Overview

Poor postures at work are a major source of MSD's (Musculoskeletal Disorders - injuries and conditions that affect the human body's movement or musculoskeletal system). MSD's can result in a huge cost to a business through lost working days and decreased productivity amongst affected staff. This session will focus on the risks of adopting poor postures whether using a smartphone, computer or laboratory equipment such as microscopes or pipettes.

The webinar will help delegates to understand what is happening within the body when we adopt and maintain static or poor postures, or carry out repetitive actions. Advice will also cover setting up the work area correctly, whether in the office or in a laboratory, and how to achieve good postures.

Who should attend?

This is a one hour webinar which is designed for laboratory technicians, no previous knowledge or experience is required.

The webinar will comprise of an overview of why and how musculoskeletal disorders develop and 'Hints & Tips' for setting up a workstation and the equipment used.

Aims

The aim of the webinar is to give delegates the confidence and knowledge to be able to set up their workstation.

By the end of the webinar delegates will -

- 📦 Understand the risks of adopting poor postures at your workstation
- 📦 Know how to set up your chair correctly
- 📦 Know what a good workstation set up looks like
- 📦 Gain an understanding of other 'Hints & Tips' for using laboratory equipment
